

# NATIONAL APPRENTICESHIP WEEK PARENT'S EVENING

**FEB 8, 2022 6.00 PM**

**All About STEM deliver the ASK (Apprenticeship Support and Knowledge) Programme in the Wirral, Warrington, Knowsley and Cheshire regions on behalf of the Education and Skills Funding Agency, which is a part of the Department for Education.**

This parents session will explain more about:

- How apprenticeships have evolved over the years
- Opportunities available for your child
- Job prospects after the apprenticeship is complete

There is also the opportunity to ask questions to help you support your child to make informed choices about their future.

As parents and carers, we know that you are keen to hear about all options available to your child so that you can support them in their decision making.

What we're going to cover is important because even if your child does already know what they're planning to do after school – plans can change and so it is important that they are aware of all of the options available to them so that they can make the most informed decision for them.

Apprenticeships have also changed significantly over the past few years and there are some brilliant opportunities available for your child. Through apprenticeships, you could achieve a degree in a variety of vocational and professional careers – from biochemical engineer to solicitor to nurse!

Parents with children in all areas of the Merseyside and Cheshire region are welcome to attend and can be put in contact after the session with your local ASK representative.
